

DR. SHALINI KAPOOR, M.D., C.M.

DR. SHALINI KAPOOR, M.D., C.M. (also known as "Dr. Shalini, M.D.") is an award-winning published research scholar, medical doctor and surgeon, and expert laser specialist and cosmetic/aesthetic physician consultant who graduated from the McGill University School of Medicine, a world-renowned Ivy League Institution, with Honours ("Faculty/University Scholar" standing). She is a prominent and skilled, Triple Board Certified Eye and Multidisciplinary Laser Surgeon specializing in Laser Refractive Surgery (LASIK), Aesthetic Laser Surgery for total Facial and Body Rejuvenation as well as Facial Aesthetics and advanced injectable and shaping procedures including BOTOX and Fillers (such as Restylane, Juvederm and Radiesse). Dr. Shalini is also board certified and a Diplomate of the American Board of Laser Surgery, the American Academy of Aesthetic Medicine, the American Society for Laser Medicine and Surgery, and of the American Academy and Board of Ophthalmology.

Active in research (even through medical school and residency), Dr. Kapoor has published many scientific papers throughout the world, presented her findings nationally and internationally, and has won numerous awards for her work. Dr. Kapoor, as a member of the National Association of Medical Communicators (NAMC) [previously the National Association of Physician Broadcasters (NAPB)] has also had considerable experience as an expert lecturer, consultant and medical television show host, and has made numerous media and national television show appearances featuring her work in lasers. She is also currently in development on a new television show pilot focused on bringing cutting edge health topics to the forefront in an exciting entertainment-based format, and also developing her new Anti-Aging "Dr. Shalini MD" Skin Care line using European and Ayurvedic based ingredients for the prevention of premature aging. Dr. Shalini M.D. was also the first doctor in the world to have and offer to patients a new revolutionary technology to treat deep facial wrinkles as well as wrinkles around the eye called the Matrix IR, and won an International Award for "Merit and Distinction in Aesthetic Medicine" on an overseas trip to several countries in East Asia where she lectured and gave several advanced workshops to doctors on the Matrix IR Fractional Wrinkle Reduction Technology. She hopes to continue her international tour to further educate doctors and the public all over the world on this and other revolutionary laser technologies and on current cutting edge and state-of-the art techniques available for facial and body rejuvenation. Research will always continue to be one of Dr. Shalini's top priorities and passions, as well as continuing her vision for teaching and imparting her expert knowledge of the aesthetic laser field as a board and faculty member of the American Academy of Aesthetic Medicine, and as an official board examiner for the American Board of Laser Surgery.

Also featured extensively in the media after publishing her research work on the "Shaken Baby Syndrome", as well as having discovered a variation in the gene for childhood Tay Sachs

Disease, Shalini has always had an immense passion for children and has worked with many charitable organizations working towards the prevention of child abuse. Dr. Kapoor is also currently working with the Delta Society helping train Animal Assisted Therapy dogs visit children in foster homes and hospitals, strengthening the human-animal bond and improving the physical and emotional health of patients in the process. She hopes to continue her work helping children in various capacities including direct care at Children's Hospitals, Make-a-Wish Foundation and "Save The Children" helping sick, poor and orphaned children worldwide.

DR. SHALINI, M.D. is the Medical Director and Founder of REVIVE: The Beverly Hills Medical Institute for the Eye and Facial Aesthetics, and provides the very latest in high quality and cutting-edge Ophthalmological, Facial and Body Aesthetics and Anti-Aging care to patients in Beverly Hills and the surrounding areas. Her clients are diverse ranging from professionals to cover models and beauty pageant contestants to actors/actresses as well as celebrities and international Royalty. Dr. Shalini is also the Medical Director of LaserAway Medical Spas throughout California (where she trains all her highly qualified nurses, nurse practitioners, and physician assistants in lasers as well as global facial and body aesthetics) providing state of the art, non-invasive aesthetic laser procedures. Locations can be found in Beverly Hills, Santa Monica, Marina Del Rey, West Hollywood, Sherman Oaks, Newport Beach/Costa Mesa, Carlsbad, San Diego, Rancho Mirage, and San Francisco.
