

Dr Kelvin Chua,
more than just a Doctor
A doctor who sees beyond
skin-deep beauty

Being the Founder and Medical Director of SL Clinic with two clinics under my helm, and armed with 9 years of aesthetics practice experience, I am one of the few doctors licensed to use new advanced vibroliposculpture technique for fat removal and shape the body contours to create smooth and slim thighs, removal of cellulites, creating six pack abdomen using selective liposculpturing of abdomen fats. To date, I have done more than 500 liposuction and fat transfer procedures.

On top of my experience in liposuction, I specialize in face sculpturing, skin laser treatments, hair transplant, Thermage, Botox and Fillers and more.

In the past year, I have been the trainer for Allergan's Botox and Juvederm Fillers in Indonesia and Singapore in Singapore and Indonesia. I also attended the recent Asia Pacific Medical Aesthetics Conference in the Philippines, and assisted in training for the American Academy of Aesthetics Medicine in fillers and laser.

BODY SCULPTURING

I specialize in combining the two latest technologies, lipolysis and vibroliposculpture, to give the best results with minimum downtime. I have done extensive research on various forms of weight management and fat reduction techniques. My patients come from various parts of the world, seeking effective body sculpturing treatments.

In my quest for the perfect body sculpturing, I have created many contouring techniques to create the

“The ability to change a person's looks and body shape, and seeing them happy and confident is in itself a great reward. The beauty and aesthetic industry is one in which the doctor must know how to appreciate art and beauty. He/she must know and understand what each individual client wants and perceive beauty as, and what beauty can really bring them.”

Dr Kelvin Chua, SL Clinic

perfect body shape. I have invented a unique thigh contouring which has been well received by many patients. With a successful track record that spans more than 7 years, I have performed many cases with no complications.

My advanced liposuction technique involves creating beautiful curves throughout the body like the thighs, arms, or creating six pack muscle-like abdomen, waist, chin, back etc. I believe in shaping the curves of the body rather than just sucking out fats. Advanced liposuction is an art to me and it is important to understand the essential shape needed in different parts of the body. I have also done extensive research on various forms of weight management, fat reduction and fat transfer techniques. It was invited by Channel News Asia to give my opinion

HAIR/SCALP EXPERIENCE

I have attended a course on Follicular Unit Extraction (FUE) and Follicular Unit Transplantation (FUT). The purpose of attending such a course is to widen my scope of understanding in aesthetics, besides specializing in facial skin and body sculpturing.

I also believe in actively lending my opinions and sharing my experience with consumers through channels such as popular beauty/ lifestyle media including Simply Her, Nu You, Her World, Women's Weekly, Aesthetics Beauty Guide, Straits Times, just to name a few.

and advice on this sought-after procedure, Fat Transfer.

FACE/SKIN LASERS

I have a keen interest in the treatment of various skin conditions with novel effective techniques, so I keep myself well informed of the latest developments in anti-aging and aesthetic medicine by attending elective conferences and training workshops regularly in Europe and USA. I started my surgical training in Australian teaching hospitals, spending time in dermatology and surgical rotations. Some of my notable treatments include Fractional CO2 Laser which is most effective for acne scar problem. And my patients appreciate the way I advise them on appropriate volume of fillers or Botox to be injected for a natural look. I have performed more than a thousand Botox and fillers cases and thousands of all kinds of lasers.

LIST OF SERVICES/ PRACTICE:
