

Lewis M. Feder, MD

965 Fifth Avenue
New York, NY 10075
(212) 535-8700

Dr. Feder is the prominent Fifth Avenue Dermatologist and Cosmetic Surgeon, with more than 20 years of unparalleled experience in all aspects of cosmetic dermatology and aesthetic surgery. Dr. Feder is also a famous author on many scientific publications, an international lecturer and an inventor of more than one hundred skin treatment and rejuvenation products that are in international distribution. In addition, Dr. Feder hosted a weekly television show “Here’s Looking at You”, on cosmetic surgery, beauty, and health for more than fifteen years in New York City. He is often called upon by many of the world’s top celebrities and world leaders to attend to their esthetic needs, and his private operating room often attend to them.

He graduated with distinction from Hobart College and New York Medical College, in New York City. Dr. Feder did residencies and fellowships in the United States Public Service Hospitals and New York Presbyterian Hospital - Weill Cornell Medical Center, New York City. These included the fields of dermatology, pathology, and cosmetic surgery. Among his various fellowships in cosmetic surgery worldwide, one of the most notable is with his mentor, Dr. Pierre Fournier in Paris, the inventor of syringe- liposculpture, with whom he spent two years.

Lipo-sculpture is another modality in which Dr. Feder is an expert. He worked closely with Dr. Giorgio Fischer of Rome, Italy- the inventor of liposuction surgery. He also studied under the

late Dr. Benito Rish, one of the world's top cosmetic surgeons who had performed more than 20,000 rhinoplasties and the inventor of the Rish chin implant, which is in active use today.

Dr. Feder also collaborated with Dr. Marlen Sulamanidze in Moscow, Russia, where Dr. Feder taught his micro-lipo-foundation technique to a group of cosmetic surgeons. Dr Sulamanidze invented the Aptos Facial Thread Technique, which Dr. Feder introduced to the United States. Both procedures together were later named the "Feather Lift." Dr. Feder is the first cosmetic surgeon to use this breakthrough procedure in the United States.

Dr. Feder pioneered and perfected chemo-dermabrasion for facial resurfacing and acne scarring (using the combination of chemical peel and dermabrasion) in addition to utilizing laser surgery. He is at the forefront of autologous fat cell transplantation (fat injections) and liposculpture research, developed in conjunction with Dr. Pierre Fournier.

He uses the latest development in laser therapy and IPL (Intense Pulsed Light) to treat various skin abnormalities. He also uses Zerona and Pelleve as some of his treatment options. Besides specializing in non-invasive cosmetic surgery, he also has an active practice in anti-aging medicine, including injectables, as well as his highly effective skin treatment products.

Dr. Feder is an attending physician at New York's Beth Israel Medical Center for many years. Dr. Feder has served as a Cosmetic Surgery Consultant to Ethicon, Inc., a division of Johnson & Johnson for new product development and technical procedures.
